

## **Neartown Animal Clinic Now Offering Advanced Endoscopic Services!**

**Raleigh, NC - July 31, 2024** – We're thrilled to announce that Neartown Animal Clinic in Houston, TX is now offering cutting-edge endoscopic services, including endoscopy, rhinoscopy, and otoscopy, with the VetOvation system. This advanced technology allows our veterinarians to use a tiny scope to diagnose and treat various conditions inside your pet's stomach, ear, and nose.

Endoscopy is a minimally invasive procedure that enables us to look inside the stomach and even remove foreign objects or perform biopsies, reducing the need for more invasive open surgical procedures. This means quicker recovery times and less discomfort for your furry family members.

They are excited to bring this technology to their clinic to enhance the care and treatment we provide to our patients. Your pet's health and well-being are top priorities, and together we are committed to offering the best possible medical care.

**About VetOvation** – VetOvation is committed to advancing veterinary care through innovative surgical technologies. Many of these tools have been around for years in the human medical market but have not yet made the transition to veterinary medicine. By equipping veterinarians with innovative tools and techniques, VetOvation aims to improve animal health outcomes and enhance the quality of life for pets everywhere. Their dedication to veterinary excellence is reflected in their continuous efforts to provide the best surgical solutions and support to veterinary professionals.
